

# FUNDAMENTAL & APPLIED BIOELECTRICS

## An International Scientific Workshop

**July 9-12, 2018**

**OLD DOMINION**  
UNIVERSITY

IDEA FUSION

**Frank Reidy Research Center for Bioelectronics  
Norfolk, Virginia, USA**

Open to all researchers (students, post docs and investigators)  
interested in the field of Bioelectronics

**Topics include:** Pulse power physics, modeling, tissues and cells in electric fields, cell sensitization, electroporation, drug and gene delivery, development of devices and electrodes, cancer treatment, wound healing, cold plasma physics, applications and hands-on laboratory work.

Space is limited and will be on a first come first served basis
